

I heartily oppose HR 4026. I made the decision to purchase an XM radio and pay a monthly fee for content. I made this decision due to the inferior product provided on regular radio. The XM Instant Traffic & Weather is concise, accurate and directed at my local driving area. It is a far superior product which I am willing to pay directly for each month, instead of paying every two minutes in the form of commercials for an inferior service on regular radio. Please do not protect the large wealthy corporations - make this a level playing field for all.
